Electronic Specifications

We accept electronic files in one of the following formats

- InDesign CC
- Illustrator CC
- Photoshop CC
- High-resolution PDF (See our PDF Guidelines)
- High-resolution TIFF
- High-resolution, vector-based EPS
- JPG files are not ideal, but may be submitted, provided they are at least 300 dpi

Collect for Output

- Include all screen and printer fonts. If not included, we may substitute fonts from our font library
- Include all supporting files (the graphic images placed in your document)

Four-Color Ads

- Send a paper proof
- CMYK, not RGB format
- Remove all unused colors from your color palette
- Convert all PMS or RGB colors to Process CMYK

IMAGE GUIDELINES . . .

Produces Best Image Quality

- Original photos processed from a negative
- High-resolution digital photos
- High-resolution scans

Produces Low Image Quality

- Faxes
- Digital photos printed on an inkjet or laser printer
- Graphics used for a website
- Images under 300 dpi at 100%;
NOTE: Opening a 72 dpi image, and changing the resolution to 300 dpi, will NOT improve its quality

CAUTION . . .

- We cannot guarantee print quality for low-resolution images (under 300 dpi)
- We cannot guarantee a perfect color match to specific PMS colors
- We cannot guarantee proper appearance of submitted artwork without a paper proof provided by advertiser or ad agency
- We cannot guarantee grammar, punctuation and spelling in submitted artwork; if there are problems in your artwork, we will try to contact you, and then proceed using the artwork

PDF Guidelines

All of the following are required:

TURN OFF COMPRESSION.
DO NOT SUBSET FONTS. EMBED FONTS.
IMAGE SIZE MUST BE AT LEAST 300 DPI.
We cannot guarantee print quality for low-resolution images (under 300 dpi).

Crop, Printer and Registration Marks.

For InDesign users, be sure cropmarks are turned off. Our magazine is printed in 16-page signatures, so to avoid confusion with our printer's set of crop marks, any registration marks are removed from submitted artwork.

Full-Page Ads. Our full page trim size is 8-3/8" x 10-7/8". **If the ad bleeds,** please add 1/4" beyond final trim for bleed. Avoid setting any type too close to the trim edge – do not place anything important less than 1/4" from trim edge.

Color. Remove all unused colors from your color palette, and be sure all colors are converted to process colors. PMS colors in ads will be converted to CMYK. If your images are in color, they need to be CMYK. Use the color management profile **US Web Uncoated when building black and white ads – most ads run on un-coated stock.**

More PDF Information. Instructions on how to make pdf files to our specifications are available for download on our website, www.publicationprinters.com/docdownloads.html (courtesy of Publication Printers).

Media & File Transfer

Media Accepted: CD-ROM disks

File Transfer: Email is acceptable for files smaller than 25 mb; if the file is larger than 25 mb, please send via FTP.

Please include contact information with your email in case there are any problems with your electronic files

Livestock Publishers FTP

FTP Software. In order to upload files through FTP, you need FTP client software. There are a variety of FTP clients available for purchase or download. **For the Mac,** you can get Fetch, Transmit, or some others. **For the PC,** there is SmartFTP, CuteFTP, and many others. These can be found at shareware.com or cnet.com.

FTP on the Internet. Web-based FTP is available through www.yousendit.com

Our FTP Account Information. Please contact your sales representative if you plan on sending your artwork via FTP. After the files are uploaded, please call or e-mail your sales representative to let him know the upload is complete.
